Dear Valued Customer,

Thank you for your recent grille purchase! Our grills are made overseas, but are Triple Plated in the United States. Although our grills are triple plated, you must perform this simple task to insure long lasting life! The only part of the grill that has the heaviest chrome is the front edge, therefore (just like the originals), the side edges and back must be primed and painted! The original paint was a semi-gloss acrylic enamel. If you follow this process, your grill will last.

If you have any questions, call your parts representative at 1-800-999-CHEV (2438).

Thanks again.
